

# Environment and Sustainability Policy

**We are committed to implementing the best Environmental and Sustainability Policy**

Ferrovial York Joint Venture (FYJV) is committed to integrating environmental values from project design through to construction to reduce the Project's environmental footprint, eliminate infringements, complaints, non-compliances and make an enduring positive impact on the surrounding community.

FYJV's goals are to promote environmental protection and sustainability through prevention of pollution and adverse environmental impacts, efficient use of resources, recycling of materials and compliance with legislation and approval documentation.

FYJV will provide the necessary resources and management support to ensure these goals are achieved. We have established and will implement an environmental management plan which addresses each of the Project's environmental aspects. The plan will be continually maintained, reviewed and be utilised to drive a strong environmental culture.

It is our Policy to:

- Conduct our operations in compliance with all applicable environmental Acts, Regulations, Statutory and Client requirements
- Establish measurable objectives and targets to measure, review and seek to continually improve our performance
- Openly and transparently communicate and consult with employees, contractors, clients, key stakeholders and the community to optimize their involvement and positively influence environmental and sustainability outcomes
- Eliminate and mitigate environmental risk by identifying, assessing and planning suitable controls for each environmental aspect
- Educate and train our team to improve their environmental and sustainability awareness, skills and knowledge
- Monitor and audit our processes and activities and use the outcomes to enhance our environmental processes and performance
- Demonstrate leadership and encourage teamwork and participation to achieve environmental best practice outcomes and our sustainability objectives

**Adherence to the principles outlined in this policy is a condition of working on the Northern Beaches Hospital Connectivity and Network Enhancement Project. This applies to each person who works for us or under our control including employees, consultants, subcontractors and suppliers.**

Raul Pascual

Project Director
