

Ferrovial Construction UK has participated in the Supply Chain Sustainability School (UK)

We are one of the over 230 Partners, ranging from 19 of the top 20 contractors, the top 10 housebuilders, suppliers, and manufacturers from across the industry, who are focused on one goal – becoming more sustainable, competitive, and profitable.

Relevant benefits:

- **Access to Sustainability Expertise:** Access to the value of sustainability expertise and resources, plus benefit from training sessions to reduce environmental impacts, enhance social responsibility, and improve economic sustainability within the supply chain.
- **Networking and Collaboration Opportunities:** Networking opportunities with 200+ like-minded organizations, allowing for collaboration and knowledge-sharing to address common sustainability challenges and drive positive change collectively.
- **Enhanced Reputation and Competitive Advantage:** Boosting Ferrovial Construction's reputation, demonstrating our commitment to responsible practices, which may lead to increased competitiveness and potential business opportunities within the industry.

Ferrovial Construction Supply Chain Values Awards 2024

With the aim of creating a thriving and integrated supply chain to ensure certainty of delivery for a world on the move, Ferrovial Construction celebrates the awards ceremony to recognise the application of the corporate values in the supply chain: Integrity, Innovation, Respect, Collaboration and Excellence.

Integrity: Ethics • Transparency • Responsibility

We pride ourselves on our integrity – to always deliver on our commitments and promises to clients, partners, supply chain and communities with whom we work.

Integrity is vital for our industry and a commendable and ethical way of working. This award is in recognition of the transparent, ethical way of working of our supply chain partners. It is for those who recognise their responsibility and behave accordingly.

Innovation: Progress • Transform • Inspire

A focus on enhancing our entrepreneurial and digital culture to continually improve automation, efficiency, agility and data to support future growth for our clients.

This award recognises members of our supply chain who have delivered innovation for or in collaboration with and contributed to the advancement of the project or our industry.

Respect: Safety • Care • Protect

We are committed to leadership based on self-demand, respect, and recognition of a job well-done. We ensure that our impact is respectful of the environment and the communities in which we operate. This award recognizes our supply chain partners who are committed to delivering excellence safely, with a focus on the environment and continuous change for good.

Excellence: Efficiency • Results • Reliability

We are analytical, rigorous, and precise. We dream big with every challenge, taking into account the resources to complete them. This award recognises supply chain partners who have delivered exceptional results time and time again – whether from a technical, commercial or qualitative perspective.

Collaboration: Teamwork • Co-operate • Share

We know that our people are the reason behind our success. We encourage the responsibility and autonomy of our staff, but we multiply our contribution through collaboration. We are the result of the sum of many individuals and businesses; our sense of belonging and inclusion makes us unique.

This award recognises the member of our supply chain that has collaborated fully and consistently – putting project needs over any other parties' and sharing best practice and knowledge.
