

ENERGY, PHOTOVOLTAIC PLANT, SORIA

Ferrovial to build two photovoltaic plants in Soria with capacity to supply 30,000 households

- Ferrovial will design and build the facilities and undertake operation and maintenance for two years
- The solar project will avoid 29,700 tons of CO₂ emissions per year

Madrid, 09/04/2024. - Ferrovial is to build two photovoltaic plants in Matalebreras, Soria (Spain) for Aquila Clean Energy with the capacity to supply 30,000 homes. In line with its commitment to renewable energy, the company will design and build the facilities and provide operation and maintenance services for the first two years.

Ferrovial will develop the Trevago I and Trevago II plants on a turnkey basis. The two facilities will have a combined capacity of 62 MWp (megawatt peak) – 31 MWp each – and will produce a total of 114 GWh/year. The two new solar plants will avoid 29,700 tons of CO₂ emissions per year.

Ferrovial will also install two power lines to connect the photovoltaic plants to the nearest substation. Construction and operation of the plants, scheduled for delivery in 2025, are expected to create close to 150 jobs.

Other Ferrovial projects in the renewable energy sector include the turnkey construction (full EPC) of the 50 MW El Berrocal solar plant in Seville, and the 72 MWp Liberty 1 solar plant in Texas.

About Ferrovial

Ferrovial is a leading global infrastructure operator, committed to developing sustainable solutions. The company operates in more than 15 countries and has a workforce of over 24,000 professionals worldwide. Ferrovial is dually listed on the Dutch and Spanish stock exchanges and is a member of Spain's blue-chip IBEX 35 index. It is part of the Dow Jones Sustainability Index and FTSE4Good, and all its operations are conducted in compliance with the principles of the UN Global Compact, which the company adopted in 2002.
